

## Open Letter to Opticians of New York.....

**Now more than ever Opticians** need to stick together and show their support for one another. Opticians in Canada are answering the call of your New York State Society of Opticians. The Opticians Association of Canada (OAC) receives the NYYSO newsletter regularly and has been following the recent events in New York State as related to the STORM and rebuilding efforts. We have been so moved by the response from Opticians organizations across the USA that we felt we needed to show our American colleagues that we wish you a complete recovery and success in attaining your goals. The OAC believes the services provided by Opticians are vital to Vision Care. The funds we donate today are in recognition for these services and the communities served by these Opticians. Good Luck

Dalie Schellen

President

Opticians Association of Canada
