

Low Vision for your Practice

How to retain Low Vision customers

**Simple and effective solutions for the
blind and visually impaired**

Would you like to retain your Low Vision customers and offer Low Vision solutions in your practice? We can help you get started!

At Optelec, we design and create low vision solutions to help the blind and visually impaired in their daily lives. We selected the most valuable and most requested products that help Eye Care Professionals to get started with Low Vision. These products include several handheld and stand magnifiers, a dome magnifier, special glasses for watching television and a lamp. With these products, you are ready to include Low Vision in your practice.
